has made it possible to display specimens belonging to the Spear collection of Polynesian material and other specimens withheld from exhibition because of lack of space. A further display of California and Nevada basketry from the Gottschall collection has also been possible, while the archaeological collections from Egypt and Europe and ethnological material from India and the Philippines have been rearranged.

The department has as heretofore been under the care of Miss H. N. Wardle, who, beside the rearrangement above described, has prepared numerous labels.

Mr. Clarence B. Moore has placed on exhibition the valuable objects found on his Green River expedition and has provided a new horizontal exhibition case for their display.

REPORT OF THE CURATOR OF THE WILLIAM S. VAUX COLLECTION.

The past year has been rendered epochal in the history of the William S. Vaux collection by the installation of new cases, in which the entire collection has been rearranged. On completion of re-labelling, which is under way, the collection will be in creditable condition.

Accessions during the year include ten specimens of calcite and geyserite from Yellowstone National Park, presented by Mrs. Walcott, and eighteen specimens purchased. Most important among the latter were hopeite and parahopeite from Rhodesia and several meteorites.

I again take pleasure in acknowledging the active and efficient assistance of Mr. Samuel G. Gordon, on whom devolved most of the actual work of transferring the collection.

Respectfully submitted,

F. J. KEELEY, *Curator Wm. S. Vaux Collection.*
